PROFESSIONAL SUMMARY

Automation Test Engineer with 3+ years of Professional years of experience, including 1.9 years in Test Automation and prior experience as a KYC Analyst. Skilled in Java, Selenium WebDriver, POM, Cucumber BDD, TestNG, Maven, API Testing, Postman, SQL, Jenkins, Git/GitHub, and JIRA. Experienced in UI Automation, Functional, Regression, Smoke and Sanity Testing, test execution, defect tracking, and CI/CD. Strong knowledge of Agile/Scrum, SDLC/STLC, XPath, CSS, WebDriver Waits, iFrames, Alerts, Multiple Windows,Select Class and JavaScriptExecutor. Familiar with Playwright MCP and OWASP ZAP.

TECHNICAL SKILLS

- **Automation Testing:-** Selenium WebDriver, Knowledge of Playwright MCP, UI Automation, Test Automation Frameworks, Cross-Browser Testing, XPath/CSS, Waits, I Frames, alerts, multiple windows Handling, JavaScript Executor, Select Class, Collection concepts.
- **API Testing:-** Postman, API Automation, JSON/XML Validation, Request Chaining
- **Security Testing:-** OWASP ZAP, SQL Injection Testing
- **Programming Languages:-** Java, SQL
- **Automation Frameworks:-** Cucumber BDD, TestNG, Maven, Page Object Model (POM), Data-Driven Testing.
- **Tools & Platforms:-** JIRA, Git, GitHub, Jenkins
- **Testing Types:-** Regression Testing, Smoke Testing, Sanity Testing.
- **Methodologies**:- Agile, SDLC, STLC
- **AI Tools:-** ChatGPT, Claude, Codex, Perplexity, Gemini

PROFESSIONAL EXPERIENCE

Automation Tester - Smartried Software Technologies Pvt. Ltd.
Dec 2024 – Present

Project : Virtuo Matrix

Description: Virtuo Matrix is a CRM platform designed to manage customer information, leads, sales activities, follow-ups, and business workflows. It helps organizations track the customer lifecycle, manage lead stages, streamline operations, and improve customer engagement. The platform also provides dashboards, analytics, and reporting to monitor business performance and support data-driven decision-making.

Roles and Responsibilities:

- Developed and maintained UI automation test scripts using Java, Selenium WebDriver, TestNG, and Maven for Functional, Smoke, Sanity, and Regression Testing.
- Designed and maintained reusable automation frameworks using Page Object Model (POM), including Page Objects, XPath/CSS locators, explicit waits, utility methods, and common actions.
- Implemented BDD test automation using Cucumber/Gherkin, integrating Feature Files, Step Definitions, TestNG, and Maven for automated test execution.
- Automated end-to-end web application workflows involving dynamic elements, dropdowns, alerts, IFrames, multiple windows, JavaScriptExecutor, and synchronization strategies.
- Performed API Testing using Postman, Validating Status codes, Response data, and JSON assertions; executed SQL queries for backend data validation.
- Managed the complete defect lifecycle using JIRA, including defect identification, logging, severity/priority assignment, retesting, and defect closure.
- Validated backend data using SQL queries to ensure data accuracy and consistency.
- Integrated and executed automation suites through Jenkins CI/CD and used Git/GitHub for version control, source code management, and team collaboration.
- Achieved 82% UI automation coverage and 72% web-service test case completion by developing 78+ end-to-end automation scenarios across critical business workflows.
- Built an AI-powered Postman script generator using OpenAI Codex and agentic AI tools to convert Excel-based API test data into automation scripts, significantly reducing manual effort and accelerating API automation.

KYC Analyst – Meta Map (Talentpro India HR Pvt Ltd)
Feb 2023 – Nov 2024

Roles and Responsobilities :

- MetaMap is a US-based identity verification platform that helps businesses verify customer identities. I was part of the ROW team, responsible for conducting KYC.
- Conducted Customer Due Diligence (CDD) and Enhanced Due Diligence (EDD) reviews to assess customer risk and ensure regulatory compliance.
- Reviewed customer documentation, including identity proofs, financial records, and transaction history, to support KYC and AML requirements.
- Performed periodic account reviews to ensure ongoing compliance with KYC, AML, and internal risk management policies.
- Conducted document verification and alteration detection to identify forged or manipulated KYC documents and prevent fraud.
- Developed strong knowledge of AML/KYC regulations, customer due diligence processes, and compliance best practices while working with global clients.
- Assisted in training junior analysts on document verification techniques and fraud indicators.

EDUCATION

Bachelor of Engineering (B.E) – SJM Institute of Technology, Chitradurga - 2022
