## Automation Test Engineer / SDET (Java | Selenium | API Testing)

**Keywords:** Automation Testing, Selenium Web Driver, Java, Cucumber BDD, TestNG, Maven, POM, Postman, Jenkins, Git, GitHub, JIRA, SQL, Agile, Playwright MCP, LLM (Large Language Model)

---

## PROFESSIONAL SUMMARY

---

Automation Test Engineer with ~3 years of experience in UI automation, API testing, and manual testing for web applications. Strong hands-on experience with Selenium WebDriver using Java, Cucumber BDD, TestNG, Maven, and Page Object Model (POM). Experienced in API testing using Postman (JSON validation, request chaining), CI/CD execution with Jenkins, and defect tracking using Jira in Agile teams. Good understanding of SDLC/STLC with a focus on smoke, sanity, functional, and regression testing.

## PROFESSIONAL SYNOPSIS

---

- ~3 years of experience in automation testing for web applications.
- Hands-on UI automation with Selenium WebDriver (Java) covering dynamic web elements and complex user flows.
- Automation framework experience using Cucumber BDD + TestNG + Maven with Page Object Model (POM).
- API testing with Postman including JSON validation and request chaining for dependent requests.
- CI execution support with Jenkins; version control using Git/GitHub.
- Defect lifecycle management using JIRA; collaboration in Agile/Scrum teams.
- Backend data validation using SQL queries to validate end-to-end scenarios.

## CORE SKILLS

---

- **UI Automation:** Selenium WebDriver, POM, Cucumber BDD, TestNG, XPath/CSS, Waits, IFrames, alerts, multiple windows, JavaScriptExecutor.
- **API Testing:** Postman, JSON assertion
- **CI/CD & Version Control:** Jenkins, Git, GitHub
- **Test Process:** requirement understanding, test case design, test execution, defect lifecycle, Agile, SDLC/STLC
- **Database:** SQL queries for backend data validation
- **Security (Basic):** OWASP ZAP (basic security testing exposure)
- **Testing Types:** Smoke, Sanity, Functional, Regression
- **Knowledge of Playwright MCP**

**Tools:** Java | Selenium WebDriver | Cucumber | TestNG | Maven | Postman | JIRA | Jenkins | Git/GitHub | SQL | OWASP ZAP | Agile/Scrum

## PROFESSIONAL EXPERIENCE

---

### Automation Test Engineer | Smartried Software Technologies Pvt. Ltd. |

Mar 2023 - Present

**Environment:** Java, Selenium WebDriver, Cucumber, TestNG, Maven, Postman, Jenkins, JIRA, Git/GitHub, SQL

- Develop and maintain UI automation scripts using Selenium WebDriver with Java for regression and smoke suites.
- Worked on framework components using Page Object Model (POM) with reusable utilities (locators, waits, common actions) to improve maintainability.
- Implement BDD test scenarios using Cucumber; Integrate execution with TestNG and Maven.
- Automate functional flows covering dynamic UI behaviors (wait strategies, alerts, iFrames, multiple windows) using XPath and CSS selectors.
- Validate backend data using SQL queries to ensure end-to-end data consistency between UI/API and database.
- Log, track, and manage defects in Jira with clear reproduction steps, severity/priority, and re-test confirmations.
- Collaborate with developers, product owners, and DevOps within Agile to support timely releases.
- Support CI execution by running and monitoring automated test runs in Jenkins and sharing results with the team.
- Execute smoke/sanity/functional/regression test cycles and provide timely status updates for release readiness.

## PROJECTS

---

### ***Virtuo Matrix (CRM Platform)***

- UI automation and functional testing for customer data, leads, and marketing campaign workflows.
- Build and execute smoke and regression suites to validate key user journeys.
- Improved test stability for dynamic UI components using locator strategies and wait handling.

### ***Fund Nexus (Banking / Lending & Leasing Platform)***

- UI automation, API testing, and basic security testing exposure (OWASP ZAP) for lending/leasing workflows.
- Validate critical flows end-to-end with UI + API checks and SQL data validation.
- Executed Postman collections with chained requests to validate dependent service flows and response data.

## EDUCATION

---

***B.E., SJM Institute of Technology, Chitradurga (VTU) | 2022***
